SUPPORTING GROWERS

Growing businesses like yours need support. Whether that means quick delivery of the highest quality and most reliable growing media, materials and equipment, advice on increasing yield, keeping pests at bay and protecting your plants, access to flexible financial solutions and energy services, we can support you.

With more than 70 years' experience of supporting growers, we have developed deep knowledge and expertise across every horticultural sector.

Professional growers in the Fargro community are able to tap into this specialist expertise by calling us to get tailored advice by phone, requesting an expert visit to your premises, or by coming along to meet us at one of our talks or events.

This depth of knowledge combined with our commitment to providing first class customer service and an excellent product range make us the first choice for growers.

“ With more than 70 years' experience of supporting growers, we have developed deep knowledge and expertise across every horticultural sector. ”

THE BEST SUNDRIES

A growing business can only be successful when it uses the best tools and materials for the job.

We stock an extensive range of sundries that we know can be relied upon to meet our professional growers expectations.

Every product has been sourced by our expert team, hand-picked in their search for innovation.

EYE-CATCHING PRESENTATION

We are specialist importers and suppliers of decorative pots, planters, baskets and gifts for retailers, garden centres and growers throughout the UK.

We supply unique and innovative products for the all-important retail occasions of Mother's Day, Easter and Christmas.

If we don't already have the right item in stock, we can source it from one of our international manufacturers on your behalf, working to your style and material specifications to the price point you need.

PROTECT YOUR CROP

A healthy growing business must maximise its yield. For many years our experts have been leading the way in providing the most effective modern methods of protecting against pests in a sustainable way with minimal environmental impact.

Fargro is respected as the UK's leading supplier of biological crop protection and integrated pest management (IPM) products for horticulture. We understand IPM and are focused on offering the best controls to suit your requirements.

We pride ourselves in being able to offer:

- Tailored customer-specific IPM programmes
- Full product technical support
- Agronomy advice

SET-UP FOR GROWTH

Our partnership with Hortec, a long-established provider of automation machinery, means that we can advise you on the best machinery for your growing environment.

Combining our horticultural experience alongside the wealth of knowledge that Hortec holds about automation of production processes, such as potting, soil handling systems and tray automation, has made us the go-to expert in this field.

Our experienced team is able to advise you on the best options for implementing or upgrading to automated processes, and how to optimise and maintain your equipment.

We can also advise on how Hortec's extensive range of hire equipment could fill a short-term capacity gap or allow you to 'try before you buy'.

“ Our experienced team is able to advise you on the best options for implementing or upgrading to automated processes and how to optimise and maintain equipment. ”

INVESTING FOR THE FUTURE

Fargo recognises that the banks don't offer your business the flexible finance that you need as a grower.

We offer capital finance, with flexible repayments to suit your business. Our finance broker will help you to find the right borrowing arrangements for your business, with seasonally phased repayments that work within the constraints of the crop cycle and take the pressure off your business.

Or, we can provide 'refinancing', to make the most of the assets you already own. If you aren't happy with your current financial arrangements, or you need to free up cash in order to make an investment in new equipment, we can help you to refinance an existing loan, organise equity release on existing assets or secure a loan against land or buildings.

SUPPORTING A GROWING COMMUNITY

Personal account management

Our account managers are on hand to support, advise and ensure you have all the support you need from Fargro

Easy online access

Our online ordering system allows you to instantly check the status of your account, view invoices, access easy reorder options and find out about stock availability. You can also request quotations for large orders, print past invoices and view statements.

Talk to our experts

If you need advice about resolving a problem with your crop, improving the yield, minimising wastage, applying a product, or any other horticultural query, just pick up the phone and ask one of our in-house experts.

This is just a small part of what Fargro can do to support your business, and, just like you, we are growing all the time.
