SUPPORTING VINEYARDS

www.fargro.co.uk

PERSONAL ACCOUNT MANAGEMENT

Our account managers are on hand to support, advise and ensure you have all the support you need from Fargo.

ORDER ONLINE

Our online ordering system allows you to order your products, check the status of your account, view invoices, access easy reorder options, and find out about stock availability. You can also request quotations for large orders, print past invoices, and view statements.

TALK TO OUR EXPERTS

If you require advice about resolving a problem with your vineyard, protecting your vines, applying a product, or any other query, just pick up the phone and ask one of our in-house experts.

ABOUT FARGRO

Growing businesses like yours need support. Whether that means quick delivery of the highest quality and most reliable products, materials and equipment, advice keeping pests at bay and protecting your vines, or access to flexible financial solutions, we can support you.

With more than 70 years' experience of supporting growers, we have developed deep knowledge and expertise.

Customers in the Fargro community are able to tap into this specialist expertise by calling us for tailored advice by phone, requesting an expert visit to your vineyard, or by coming along to meet us at one of our talks or events.

This depth of knowledge combined with our commitment to providing first class customer service and an excellent product range make us the first choice for vineyard owners.

INTEGRATED PEST MANAGEMENT

Fargro is the leading supplier of integrated pest management (IPM) products across all horticultural sectors.

We introduced macrobiological controls in 1990 and pioneered the introduction of biopesticides in 2009. Over this time we have continued to bring new innovative products to UK growers, and have generated a wealth of experience working with these premium products.

We understand IPM and are always seeking to offer the best controls to suit growers requirements. We deliver pest and disease control through the application of biological controls, biopesticides and other IPM compatible pesticides.

For Technical support and advice call: 01903 256 856 or email: technical@fargro.co.uk

CROP PROTECTION FOR VITICULTURE

Romeo a systemic resistance inducer for a range of foliar fungal diseases; downy mildew, powdery mildew and *Botrytis*

Taegro a microorganism-based fungicide for the control of various foliar diseases in a range of crops

Lepinox Plus a market-leading bioinsecticide for the control of caterpillars

BlocCade a robust physical barrier that prevents fungi and bacteria from infecting plant wounds.

30MHz

SENSING

The more you know, the better you can respond, optimising operations and preventing unnecessary loss.

From cultivation to storage, processing and transport, 30MHz makes it easy for growers to turn data from their crops and environments into better decisions, improving and increasing yield, while reducing costs. We provide all the elements horticultural businesses need to establish a wireless sensor network and start monitoring their crops in moments.

A combination of rugged sensors designed for protected and outdoor cropping conditions, a scalable and resilient private mesh network, and an intuitive platform available on any device.

INTEGRATED CROP MANAGEMENT

MYCORRHIZAL FUNGI

Mycorrhizal fungi grow in association with plant roots and exist in a symbiotic relationship, taking sugars from a plant in exchange for moisture and nutrients from the soil. Mycorrhizal fungi are crucial in a plants uptake of nutrients.

WILDFLOWER SEEDS

Maintaining a population of wild flowers is key to maintaining a healthy population of pollinators and beneficial insects. Maintaining these populations will help to ensure better pollination, pest control, and mix variety can help in revitalising the soil.

MINIGRAN® Technology

Controlled Organic Release

Microbial soil conditioners

Improved rooting

Organic fertilisers

DCM FOR VITICULTURE

Fargo's technical department have designed a comprehensive and complete DCM package for the viticulture industry, with these premium products enabling vines to access all required nutrition within the growing media. Offering the very best in mini-granule technology with accurate distribution of nutrients within each granule, crop uniformity and nutrient uptake are enhanced.

WHY INVEST IN DCM PRODUCTS?

- Offers accurate distribution across growing media
- Minimises nutrient runoff with controlled organic release ranging between 100-150 days
- Soil improver technology stimulates soil microorganisms increasing the breakdown and uptake of macro and micronutrients
- Root distribution is enhanced through easy to access nutrients within the growing media
- Improved rooting leads to increased resilience against secondary diseases, reducing disease transmission through the crop

MICROMIX

Mix of trace elements: boron B, copper Cu, iron Fe, manganese Mn, molybdenum Mo and zinc Zn. Prevents and remedies deficiency symptoms.

VIVISOL

A soil improver releasing soil phosphorus enabling uptake by the plant roots. Provides optimal plant and root health status, an ideal solution for soils with a poor structure and little soil fertility.

VIVIKALI

Compound organic fertiliser with a high amount of potassium. Slow but continuous release.

VIVIFOS

Organo-mineral fertiliser with emphasis on phosphorus. Contains easily available and organically bound phosphorus.

ECO-MIX

Eco High nitrogen content for strong growth.

DCM's organic products (left) will enable vines to reach their full potential. Controlled organic release allows for increased longevity of the product within growing media, with organic granules leaching 4 times less than pure chemical fertilisers. DCM's MINIGRAN® technology gives uniform distribution across growing media, resulting in strong root development, plant growth and yield.

VINEYARD MAINTENANCE & TOOLS

Ensuring a vineyard is well maintained is critical to securing good yields. We stock a wide range of sundries to maintain the day-to-day running of your vineyard such as:

- Spraying and application equipment
- Profil Alsace growing support systems
- PPE and Safety Equipment
- Platipus anchoring systems
- Pruning tools
- Windbreaks
- Wooden stakes

SUPPORTING THE GROWTH OF YOUR BUSINESS AND INVESTING FOR THE FUTURE

With Fargo Finance it is simple to arrange financial support for your growing business. Our terms are flexible, designed for vineyards, with repayment options that allow for the challenging cashflow of a seasonal business.

CAPITAL FINANCE

Investment in the latest smart technology, machinery or winery is critical to staying competitive. We work with specialist lenders to find the right borrowing arrangements for your business.

RE-FINANCE

If you already have a financing agreement with a traditional bank, you will understand what it is like to be at the mercy of their repayment terms. Finding the cash to repay a vast sum each month is hard work when your cashflow is cyclical, with very little coming in over the winter months. If you need to refinance a debt or get access to funds in order to make an investment, we can help you with this.
